

Sicce FILTER MEDIA

# SHARK PRO

Crystal and healthy water at any time

# SHARK PRO

Independent module  
with different  
filter media

Refillable cartridge

MECHANICAL Filtration  
30ppi density

MECHANICAL Filtration  
20ppi density

# Filter MEDIA range

## ZEROPHOS

CHEMICAL Filtration

It gets rid of phosphate within 48 hours and then maintains it in aquarium water in the right concentration.

## BIOPEARL

BIOLOGICAL Filtration

It preserves beneficial bacteria to biologically break down waste through the nitrogen cycle.

## ZEOCARBO MIX

CHEMICAL Filtration

Activated carbon plus zeolite mixed together absorb a wide range of pollutants.

The combination maintains the water healthier and clearer

## ACTIVATED CARBON

CHEMICAL Filtration

It keeps aquarium water clean and clear while removing smells and tannins.

# Filter MEDIA range

## BIOKER

BIOLOGICAL Filtration

Very porous ceramic media with large surface area for beneficial bacteria ( Nitrosomonas and Nitrobacter).

## BIOTRIX

BIOLOGICAL Filtration

It increases the natural process of decomposition of nitrite and nitrate in the aquarium. Small ceramic triangles suitable for small spaces.

## HYPERZEO

CHEMICAL Filtration

With its natural adsorbent power, ammonia is quickly trapped, reducing the creation of nitrates, through its high ion-exchange capacity.
